

India's # 1

INDUSTRIAL SOLUTIONS

BARCODE, RFID BASED TRACEABILITY

Scalable • Secure • Smart

About Unipro

Unipro Tech Solutions is a leading system integration provider in AIDC (Auto Identification & Data Capture), delivering advanced Barcoding, RFID, Wireless, and Mobile Computing solutions. With 20+ years of expertise, we help industries automate production, warehouse operations, material tracking, and asset management with real-time accuracy and visibility.

Alongside our industrial solutions, we also deliver modern cloud-based and on premise POS and ERP systems for retailers and distributors—ensuring complete integration from factory to warehouse to store.

Why Choose Us?

Empowering Industries & Retail with smarter, faster, and more profitable operations.

20+ years of retail & industry expertise

Trusted by 10,000+ businesses

Deep Domain Expertise

Fast support & continuous updates

Unrelenting Innovation

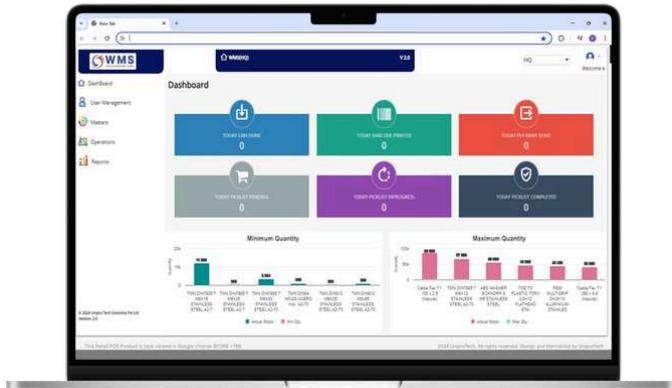

Fast implementation with reliable support

Trusted by prominent industry pioneers worldwide

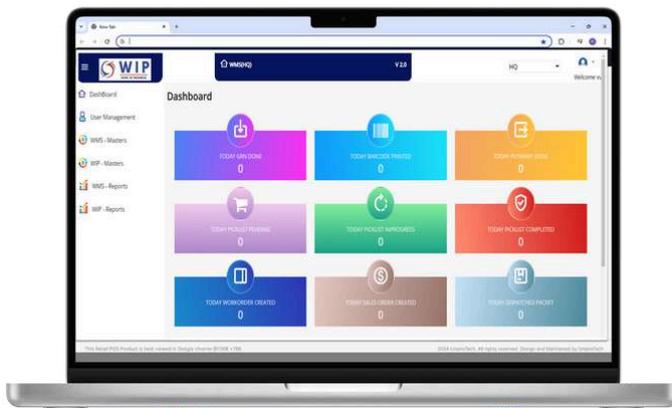

Our Traceability Solutions

Warehouse Management System (WMS)

- Organize, track, and optimize all warehouse operations with barcode/RFID-driven accuracy
- —from receiving raw materials to dispatching finished goods.

Work-In-Progress (WIP) Tracking System

- Monitor each stage of the manufacturing process in real time.
- Identify bottlenecks early, and improve production efficiency with data you can trust.

Asset Tracking System (ATS)

- Manage tools, equipment, and high-value assets with real-time visibility.
- Reduce losses and improve utilization.

Your Operations, Supercharged with Real-Time Traceability Power

Warehouse Management System (WMS)

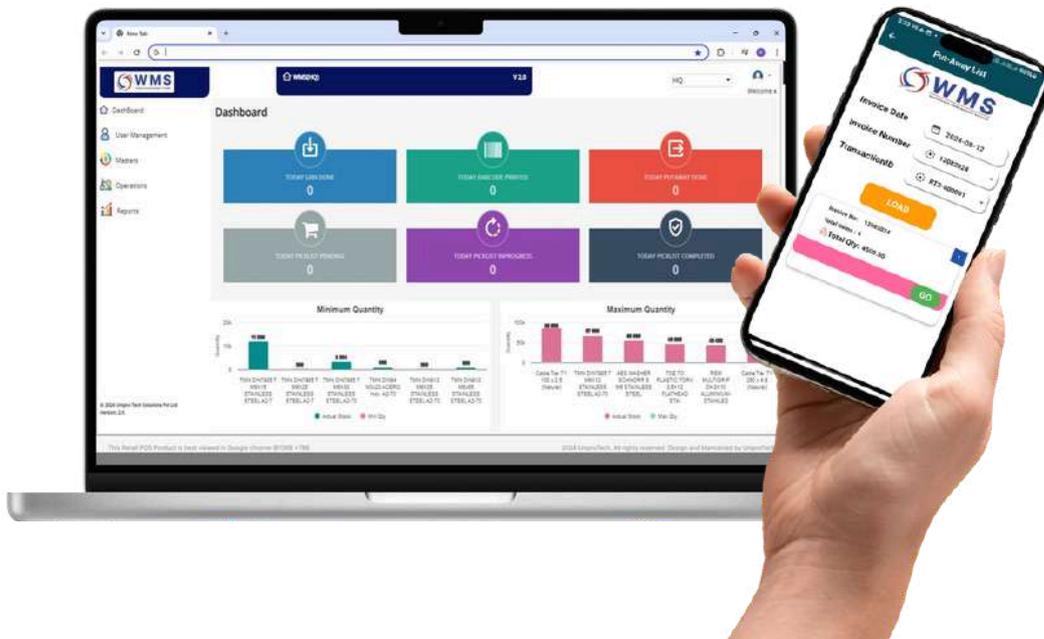

A Warehouse Management System (WMS) helps businesses optimize receiving, put-away, picking, inventory management, and dispatch operations through automation, real-time visibility, and barcode/RFID traceability.

Key Features

-  **Real-Time Inventory Tracking**
-  **Barcode / RFID Based Accuracy**
-  **Smart Put-Away Rules**
-  **ERP Integration (SAP, Oracle, Tally, etc.)**
-  **Automated Picking (FIFO, FEFO, LIFO, Batch)**
-  **Cycle Counting & Stock Audits**
-  **PDA/Mobile App Based Operations**
-  **Multi-Location Warehouse Support**

How WMS Improves Efficiency

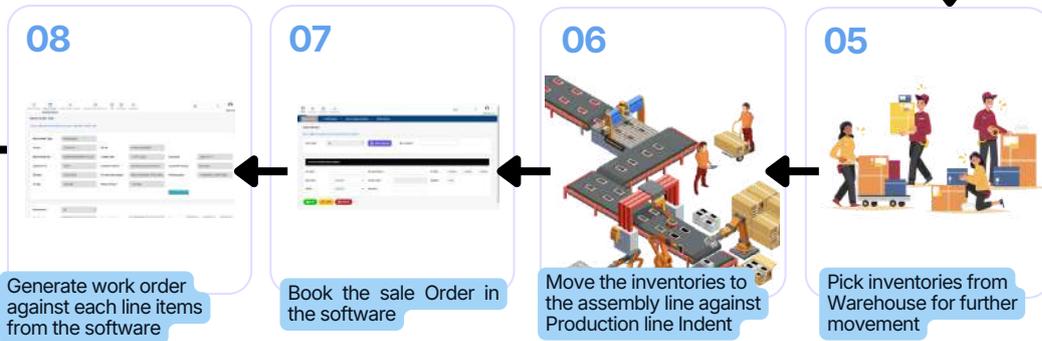

-  **Visibility**
-  **Speed**
-  **Accuracy**
-  **Decision Making**

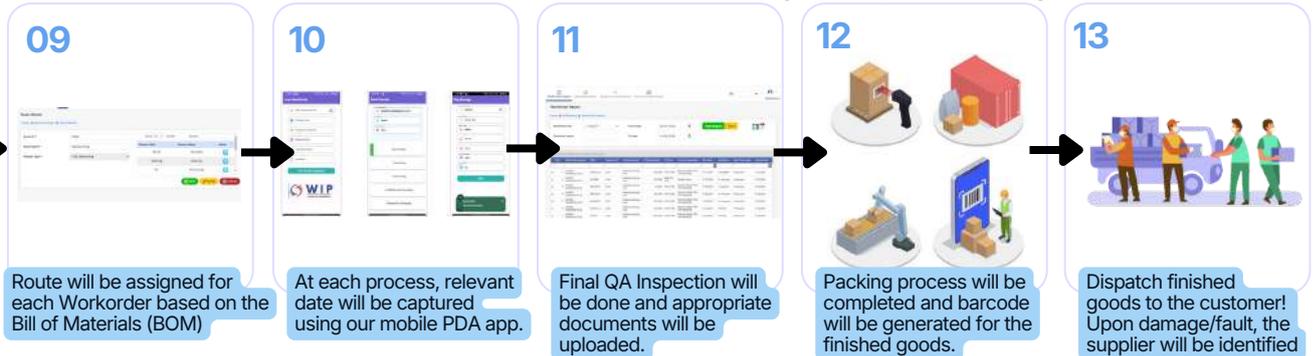

Work In Progress (WIP)

Unipro Work in Progress (WIP) Tracking Software is a specialized tool used in manufacturing and production environments to monitor and manage the status of items as they move through various stages of the production process

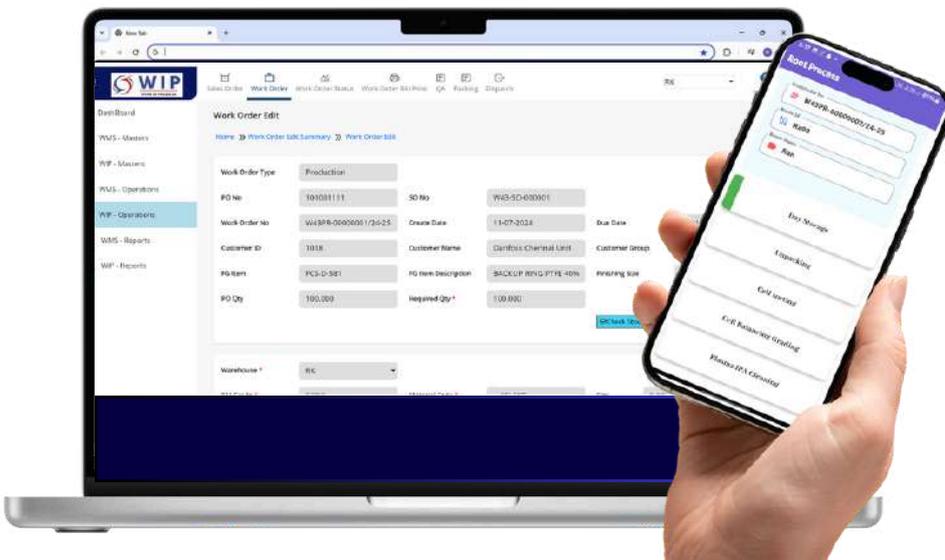

WIP Tracking Process (Inventory Movement)

WIP Tracking Process (Material Tracking)

How WIP Improves Efficiency

Key Features

- ✓ Enhanced Production Visibility
- ✓ Efficiency Optimization
- ✓ Accurate Data Collection
- ✓ Informed Decision-Making

Asset Tracking Solution (ATS)

Unipro Work in Progress (WIP) Tracking Software is a specialized tool used in manufacturing and production environments to monitor and manage the status of items as they move through various stages of the production process

TRACK CONSTRUCTION EQUIPMENT

Track and trace equipment present on each site — from PPE to Cranes!

IT ASSET MANAGEMENT SOFTWARE

Regain control of your IT Hardware and track assets such as laptops easily!

TOOLS AND EQUIPMENT TRACKING

Effortlessly track critical devices and equipment up to who used which equipment last.

Challenges faced

1. Timeliness
2. Lack of Visibility
3. Maintenance Issue
4. Inaccurate Data
5. Wrong Inventory Estimation
6. Resource Wastage

Unipro's Solution to These Challenges

1. Timeliness

Real-time data entry, automated workflows, and role-based access ensure fast, accountable, and up-to-date asset information.

2. Lack of Visibility

Live tracking, centralized dashboards, detailed asset profiles, and automated alerts improve transparency across all sites.

3. Maintenance Issues

Complete maintenance histories, document attachments, predictive analytics, and controlled maintenance permissions help ensure timely upkeep.

4. Inaccurate Data

Barcode/RFID/QR-based data entry, regular audits, and validation checks drastically reduce human error.

5. Wrong Inventory Estimation

Real-time inventory monitoring, categorization, tagging, and configurable alerts ensure accurate asset counts and forecasts.

6. Resource Wastage

Utilization monitoring, sustainability tracking, and detailed reporting reduce waste and improve ROI.

Benefits of Unipro's Asset Tracking Software

Effortless Asset Identification

Quickly locate and identify assets across your organisation.

Accurate, Reliable Asset Data

Reduce manual errors and maintain clean, validated records.

Lower Administrative Costs

Automate data entry and tracking to save time and manpower.

Simplified Asset Audits

Conduct audits smoothly with complete, real-time asset information.

Improved Maintenance Visibility

Gain better insights into maintenance schedules, history, and needs.

Track Asset Movement Easily

Monitor asset transfers and usage across sites and teams.

Full Asset Lifecycle View

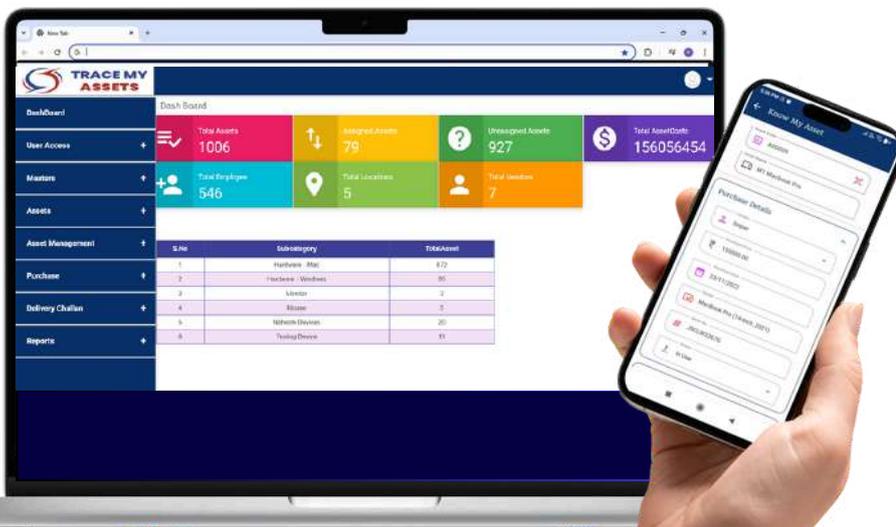

Understand each asset from acquisition to disposal.

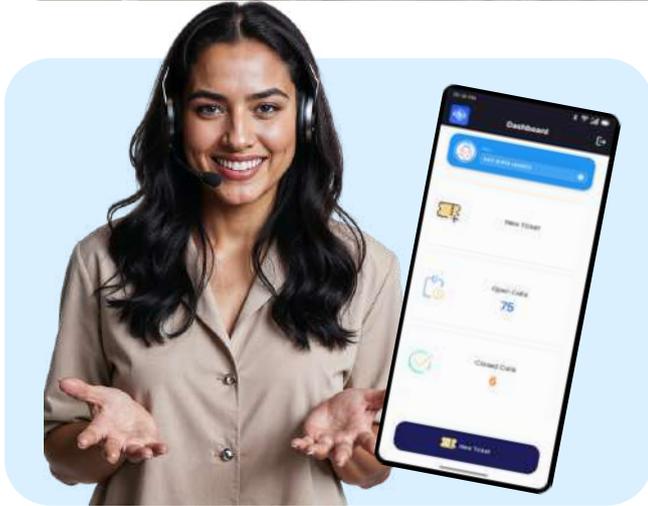

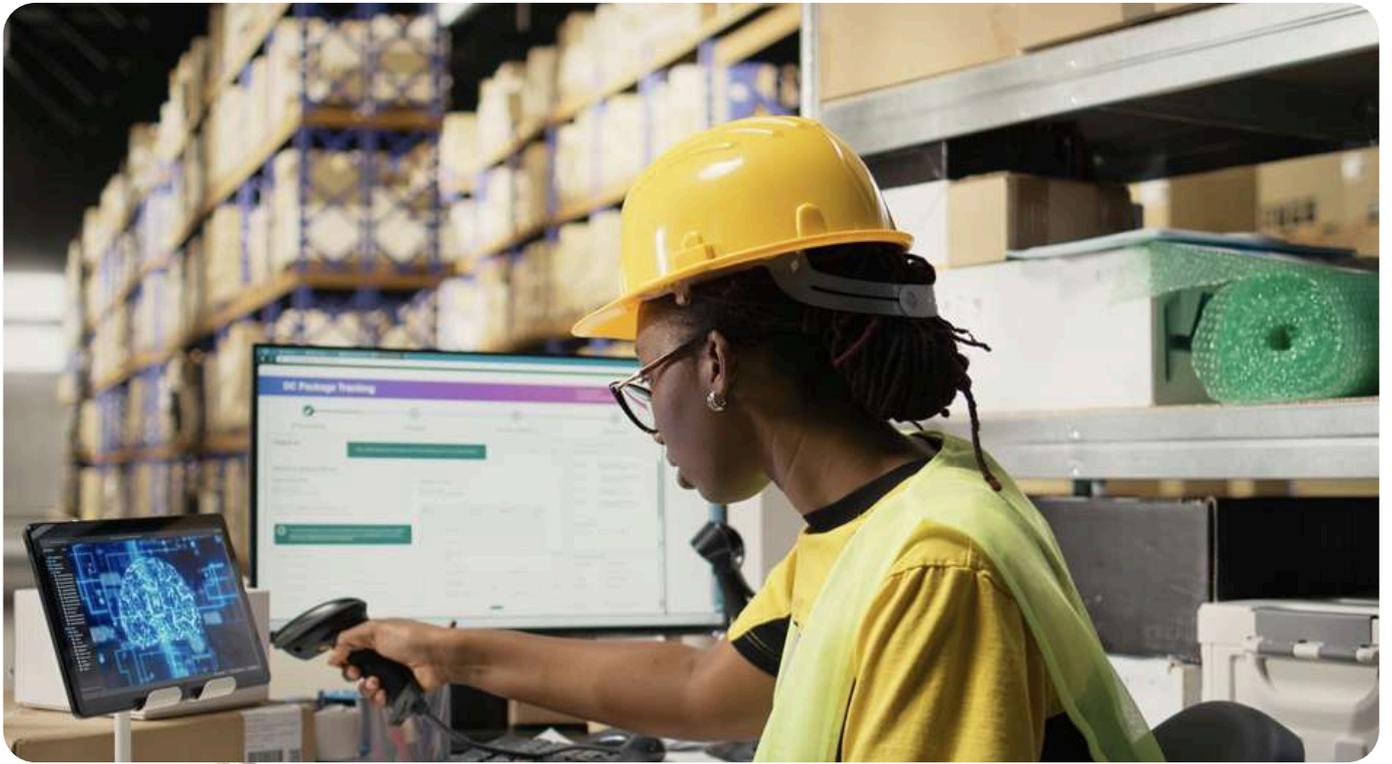

Auto Depreciation Calculations

Generate accurate depreciation values for accounting and compliance.

Key Features

- ✔ Asset Entry & Registration
- ✔ Asset Assignment & User Allocation
- ✔ Asset Movement & Tracking Across Locations
- ✔ Asset Disposal & Write-Off Management
- ✔ Automated Asset Depreciation
- ✔ Maintenance Scheduling & Service Records
- ✔ Asset Audits & Compliance Checks
- ✔ Asset Transfer Between Departments/Sites
- ✔ Asset Verification Using Barcode/RFID/QR
- ✔ Asset Rentals & Usage Tracking
- ✔ Comprehensive, Customizable Reports

Worried about customer support

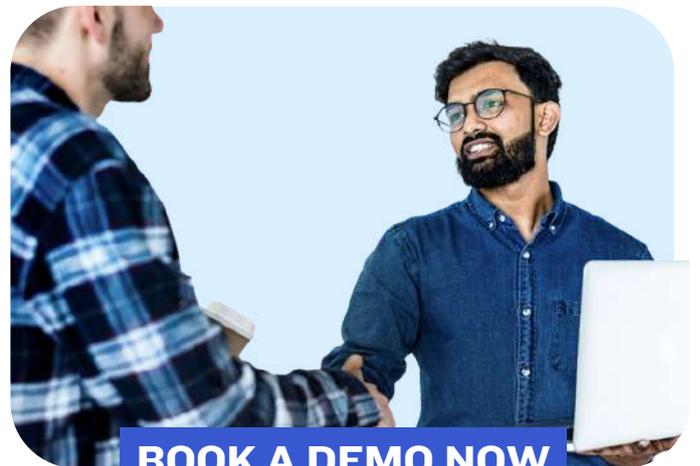

Call Register Via

- Help Desk
- Uni Reach App (By Customer)
- In House App
- 9.30am to 8pm all working days
- End to End POS training
- 5000 tickets processed every day
- 0% processing errors

An Investment That Pays for Itself.

Uniprotech offers a comprehensive retail solution built to grow with your business. With all key modules available upfront, you avoid the hidden costs and upgrade surprises commonly found elsewhere—making it a premium solution with long-term savings.

Customized pricing tailored to your needs.
